

# M10 Translation Earphones

## User manual

## Getting Started

Download the App: Search for the "One-Click Translate" app on the Apple App Store or Google Play, or scan the provided QR code to download and install the app.

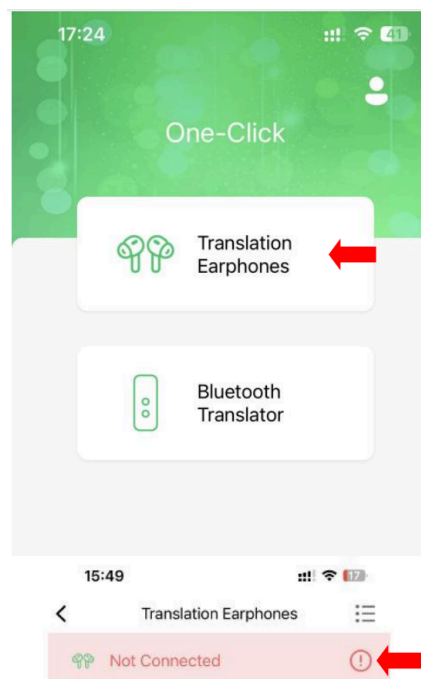

Apple iOS User

Google play

## Pairing the Translation Earphones

- Step 1: Place the earphones in the charging case, turn them on, then remove them and wait for the earphones to connect successfully.
- Step 2: On your phone, go to Settings > Bluetooth and connect to the earphones.
- Step 3: Open the "One-Click Translate" app, navigate to "Translation Earphones" mode, and ensure your device is connected via Bluetooth.

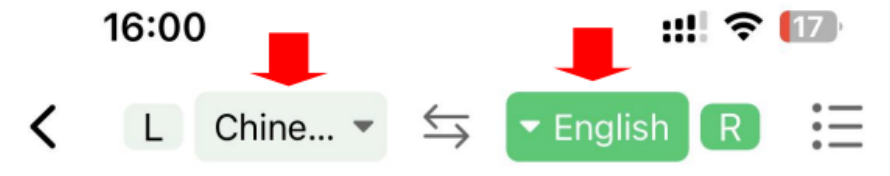

## Setting Up the Language

Assign languages for each earphone:

- Left earphone: Language A
- Right earphone: Language B

Begin conversations in your desired input and output languages.

## Translation Modes

### 1. Touch Mode:

- Each person wears an earphone.
- Tap the earphone to translate in real-time.
- Ideal for conversations with acquaintances.

### 2. Speaker Mode:

- One person wears the earphone while the other uses the phone.
- Suitable for situations like shopping or asking for directions.

### 3. Free Talk Mode:

In "Free Talk Mode", click the Start Conversation button.

- Both participants wear earphones for hands-free, real-time translation.
- Recommended for quieter environments.

## FAQ

### 1. No Sound:

- Ensure the earphones are charged.
- Reset the earphones by placing them back in the charging case and reconnecting via Bluetooth. Now the earphones can automatically pair again.

### 2. Bluetooth is unstable or the device cannot be found.

- Keep earphones close to the phone and free of interference.
- Reset by placing the earphones in the case for 20 seconds, then retry pairing.

### 3. Translation Not Working

- Restart your phone or app.
- Check network connection and ensure loud and clear pronunciation.

### 4. Charging Problems

- Confirm the charging contacts are clean and the earphones have power.

### Additional Features

- The earphones can function as standard audio devices when not connected to the translation app.
- Updates for new features and languages are regularly released via the app.
