Projection

Keystone correction

There are two ways of automatic keystone correction and manual keystone correction in this system.
Select in the "Settings" and go to "Keystone Correction". After entering, turn off the "Auto" option, and you can make a manual keystone correction adjustment, turn on the "Auto" option and the system will enter the automatic keystone correction mode.

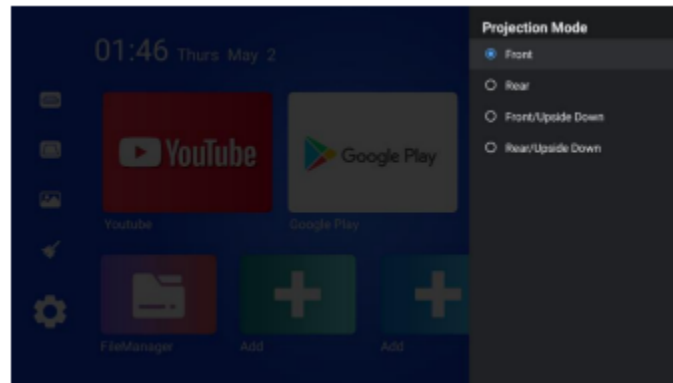

Manual keystone correction

Use the "OK" key of the remote control to switch the points to be adjusted, and then use the "direction key" to adjust different points. The "menu" key can reset the display effect, and the "return" key can return to the upper screen and save the adjustment effect.
Projection mode

Select and enter "Projection Mode", there are four options: "Front" "Rear" "Front/Upside Down" and "Rear/Upside Down".

Screen percent

Select and enter the "Screen Percent" option, and use the "up, down, left and right" keys of the remote control to adjust the display zoom, the "menu" key can reset the display effect, and use the "back" key to return to the "Settings" interface to save the adjustment effect.
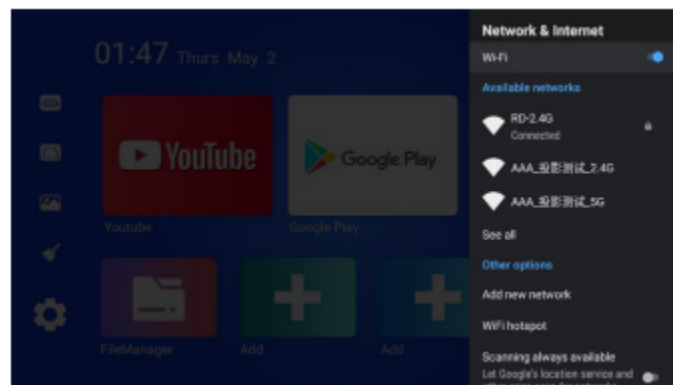

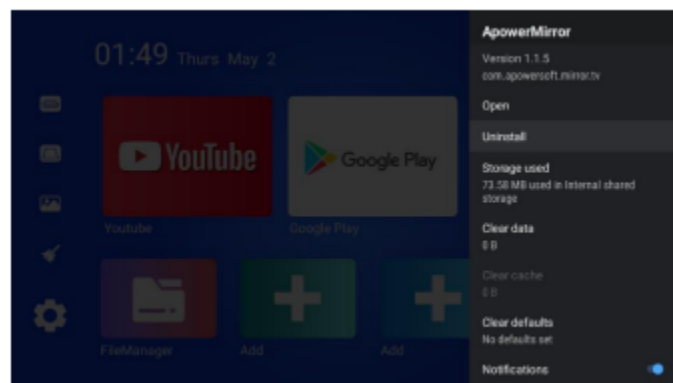

Settings

Network connect

Enter **Settings > Network** , In the Wi-Fi settings interface, connect to a network using one of the following methods:
- Select the target Wi-Fi network from the available network list. If the network is encrypted, you'll need to enter the password
- Pull down the page, select "**Add new network**," and follow the on-screen prompts to enter the network name and access password to complete the Wi-Fi connection

App uninstall

- Go to **Settings > Apps > See all apps**. This will display all installed applications
- Select the application you want to uninstall
- On the app details page, select "**Uninstall**" and follow the on-screen prompts to complete the uninstallation process

Reset

- Enter **Settings > Device Preferences**
- Select "**Reset**" and follow the on-screen prompts to complete the system reset

Common troubleshooting methods

- If the product fails to connect to the internet, check the network connection and ensure the wireless network settings are correct
- If you encounter audio output issues or anomalies, check the audio connection and adjust the volume settings
- If there is no display or display abnormalities, ensure the HDMI connection is secure and try replacing the HDMI cable
- If the product fails to power on, check the power connection and ensure the power outlet is functioning properly
- For other issues, please refer to the user manual or contact the relevant personnel for assistance
